CAREER SUMMARY

Software engineering graduate with professional experience solving complex problems in higher education and banking. Skilled in Java, Spring Boot, Angular, SQL, and REST APIs, with a passion for building intuitive applications.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL
Frontend: Angular, HTML, CSS
Backend: Spring Boot, REST APIs, Spring Security, JPA

Database: MySQL
Tools: Git, GitHub, Postman, IntelliJ, AndroidStudio, VS Code

PROJECTS

Vacaciones | Full-Stack Travel Management Platform

Angular • Spring Boot • Java • TypeScript • MySQL

- Built full-stack management application supporting trip planning, budgeting, booking and activity tracking
- Implemented secure authentication using Spring Security and BCrypt password hashing
- Developed REST APIs and database persistence layers with Spring Data JPA and MySQL
- Created responsive Angular interfaces focused on user experience
- Integrated external APIs for destination weather data and OpenAI for travel insights
- Deployed using AWS

Chalk | Native Android Gym Discovery Application

Kotlin • Jetpack Compose • Room

- Built native Android application that helps travelers discover gyms based on location and workout preferences
- Implemented multi-screen navigation via Jetpack Compose
- Designed persistent save functionality using Room and Kotlin Flow
- Developed preference-based filtering and state management for intuitive mobile experience
- Integrated Google Places API to dynamically retrieve gym information based on user location and search criteria

EDUCATION AND CERTIFICATIONS

Bachelor of Science, Software Engineering

May 2026

Western Governors University

AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

Financial Aid Specialist | Western Governors University

2023 - Present

- Analyze complex student financial aid records and documentation to ensure compliance and accuracy.
- Manage high-volume casework, applying analytical problem-solving and effective communication to support students.
